01 Visit the Kamibot website (http://www.kamibot.com) → Select Download → Under Application download and install "KamiBlock"(PC Version).
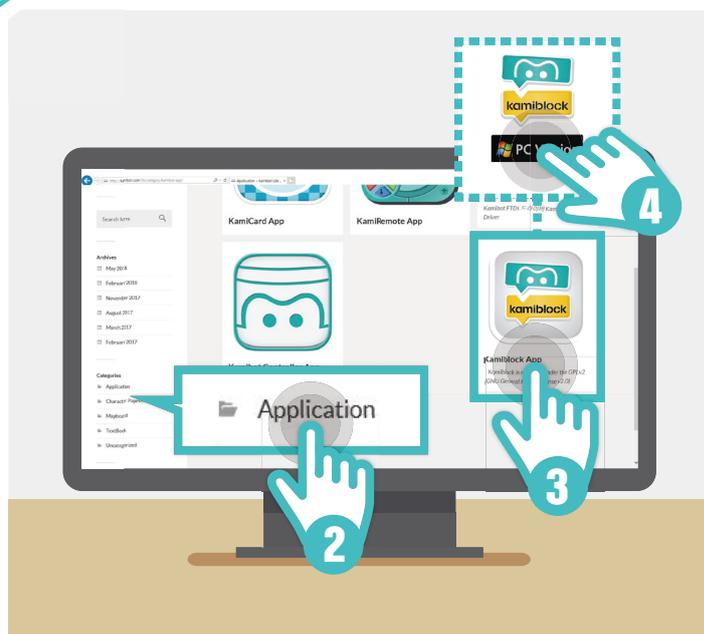

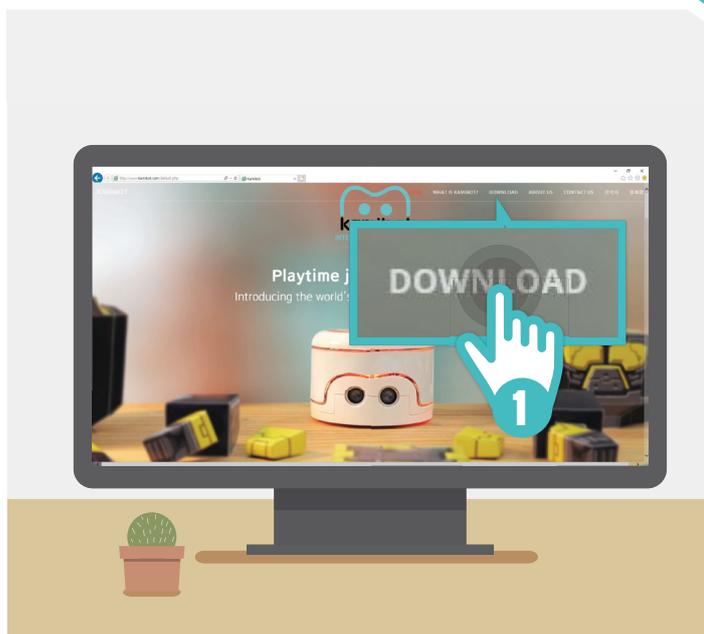

02 Start up KamiBlock(PC Version) on your PC.
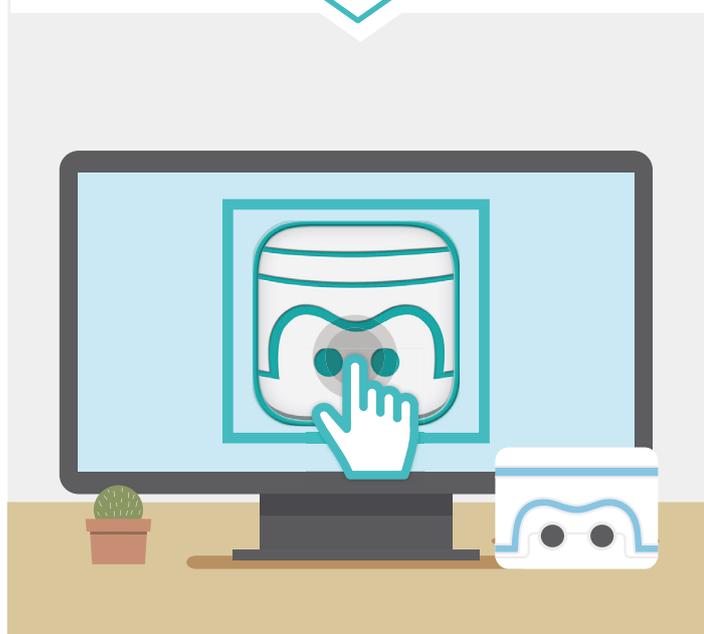

**03** Switch on your Kamibot.

ON / OFF

ON / O...
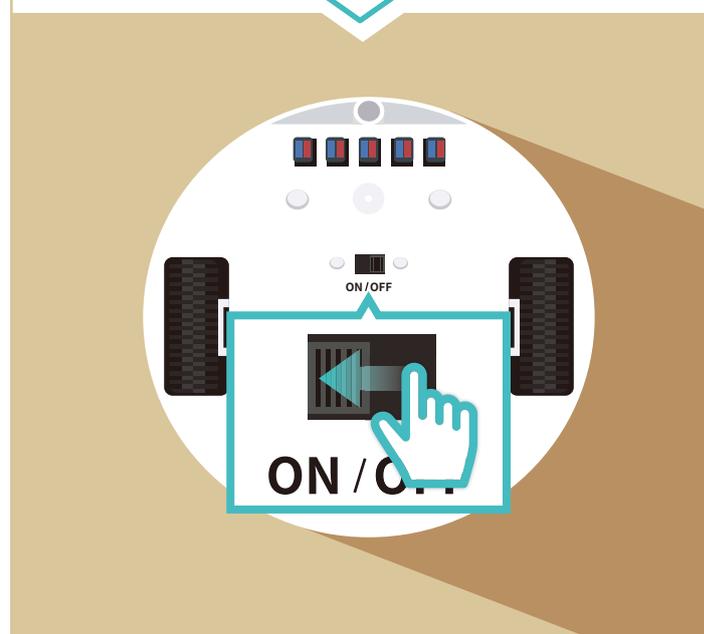

04 Connect Kamibot to your PC with the USB cable.

05 From the top menu bar select Connect → COM 28(Kamibot)
- Please ensure that the COM is indicated by a (Kamibot). Once selected, a ✓ will appear next to the selection.
- The number after COM may differ for each user.
- Once connected, Kamibot's LED will turn off for about 5 seconds and turn on again.
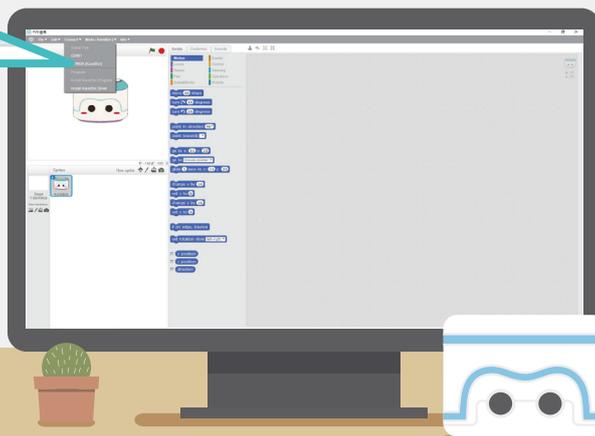

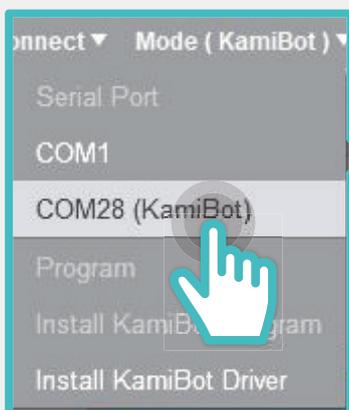

06 From the top menu bar, select Serial Port Connected → Install KamiBot Program. A small window will appear to indicate that Kamibot is uploading.

• While uploading, Kamibot's LED will turn off and turn back on once it is finished uploading.
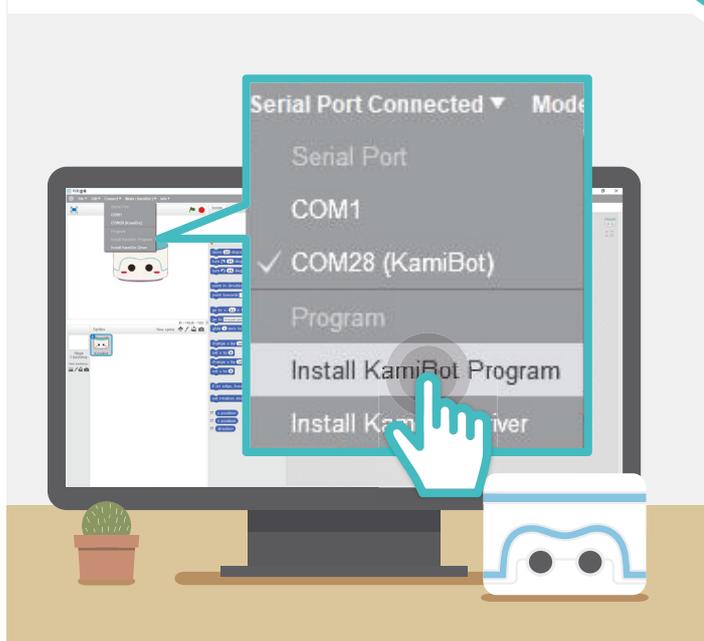

⚠ Clicking on the close button before Kamibot finishes will abort the upload.
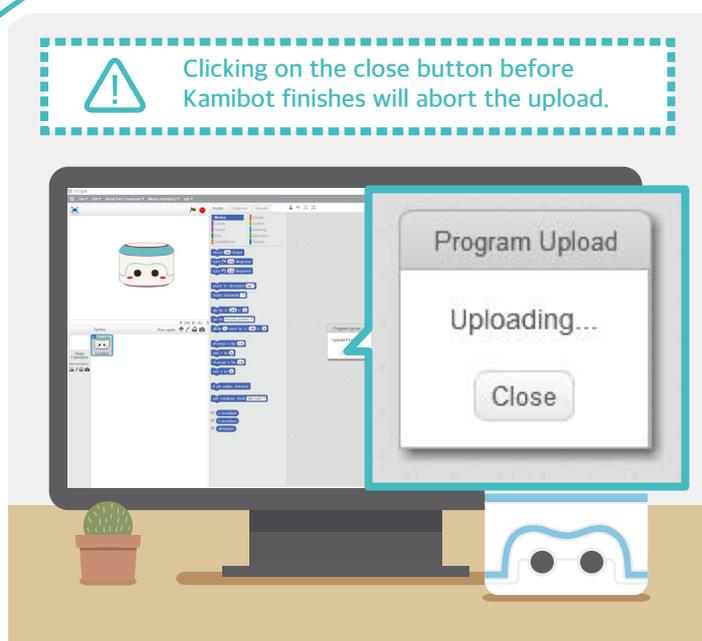

07 Once upload is completed, the message, "Upload Finish" will appear in the window. Close the window and try coding Kamibot!
